

Awesome Science Media Presents:

The Flood Geology Series

"The Great Ice Age: Evidence From the Flood for Its Quick Formation and Melting" Documentary

Documentary Summary

Since the 1700's we've been told that there have been many ice ages over millions of years, but now meteorologist Michael Oard shares evidence the main-line scientific community won't tell you. He shares compelling evidence for only one Ice Age not long after the end of the global Flood as recorded in the Bible. He'll show how the Flood produced the right conditions to develop the Ice Age in 500-700 years, then how a catastrophic melt off transpired in only 50-70 years. He also shares why only one Ice Age explains many associated mysteries such as the extension of the woolly mammoth and other mammals, massive permanent climate change, and the spread of man and animals after the Flood. He shows how the Biblical record makes much more sense of what we find in the geologic record.

DVD comes with a Digital HD version accessed through ChristianCinema.com.

General DVD Information

Length: 97 Minutes

Release Date: Fall 2013

Bonus Features: Behind the Scenes, Interviews, Previews

Format: NTSC Widescreen (16x9)

Target Audience: 16+

UPC#: 039414821796

Retail Price: \$19.99

CHAPTERS

1. Introduction
2. Ice Age History
3. Evidence in Glaciers
4. Evidence in Moraines
5. Evidence in Erratics
6. Associated Mysteries Intro
7. Wet Deserts Mystery
8. Animal Migration Mystery
9. Mystery of the Mammoths
10. Only One Ice Age
11. How much cooling?
12. One Theory Makes Sense

Bonus Features

- Behind the Scenes

- Interview with Mike Oard
- Interview with Kyle Justice
- Awesome Science Media

The Flood Geology Series Summary

This series takes leading scientists in the field of geology, chemistry, and meteorology and explores evidence for the global Flood around the world. Instead of speaking in a lecture hall or church, these scientists venture out to the geological locations to show the viewer first hand the evidence for how the Flood impacted the earth in a catastrophic manner. Scientists include Dr. Steve Austin, Michael Oard, and Dennis Bokovoy.

Bio of Producer, Kyle Justice

This DVD is produced by Emmy-nominated director, Kyle Justice. His work has appeared on such networks as National Geographic, ESPN, The Outdoor Channel, The Family Channel, and Fox Sports. Kyle started Awesome Science Media in 2010, and has been producing creation science programming since 1996.

Production Company

Awesome Science Media (ASM) is a company dedicated to producing high quality programming which presents a Biblical worldview for understand the world around us. This includes historical and operational science. This programming is geared to all ages and represents documentaries, children's shows, action adventure shows, and reality programming.

This programming first began with the Awesome Science and Flood Geology DVD series. It is now expanding to other series such as The Heavens Declare, Dino Hunter, and The Top Ten. ASM continues to develop new programming with series like Awesome Science Applied, Awesome Creatures, Ark Animals, and Ocean Odyssey. We have a worldwide audience and will continue to produce high quality programming which upholds a Biblical worldview to science.

Reviews:

Ronald Friedrich via Amazon

“Very well done and brings to light how what is generally accepted as proven fact regarding the ice age isn't proven at all. All you can do is view the evidence left behind and make assumptions as to what happened in the past. You can't go back in time and repeat it like you can with real science. You'd have to have a reliable eyewitness of the event to ever be certain. Also this video shows a lot of contradictory problems with what's generally accepted as when the ice age occurred and how often and how long. Even I can understand it. It's nice to have some of the evidence that has been used to theorize what happened in the past made understandable and be able to make up my own mind how reliable or not it is. Thanks for making this video available.”
